EDUCATION

ABES Engineering College

B.Tech in Computer Science and Engineering; CGPA: 8.2

Class 12th

St. Stephen Sr. Sec. School

2024 – 2028

Ghaziabad, Uttar Pradesh

2023

Technical SKILLS

Languages: Python, C++, C

Frontend: HTML5, CSS3, React.js, Next.js

Backend: FastAPI, Flask, REST APIs

Databases: MySQL, PostgreSQL

Developer Tools: Git, GitHub, Postman, Wireshark, MySQL Workbench

Core Concepts: Data Structures & Algorithms, OOP, DBMS

PROJECTS

ThreatLens – AI Phishing Detection Platform (Team Project) (🐙 Repo)

- Designed and implemented the **Website Credibility Checker** module for website trustworthiness analysis and phishing detection.
- Built web scraping and metadata extraction pipelines for company details, emails, phone numbers, SSL information, domain metadata, and technology stack detection.
- Developed a **credibility scoring engine** by combining multiple trust indicators for automated website risk assessment.
- Implemented website safety evaluation using domain intelligence and explainable phishing risk metrics.
- Integrated the credibility analysis module with the phishing detection backend.

NGO Smart Resource Allocation System (🐙 Repo)

- Built a full-stack system to allocate volunteers based on **skills, distance, urgency, and workload**.
- Developed RESTful backend services using **FastAPI** and MySQL for volunteer management and allocation.
- Designed a weighted scoring algorithm to optimize volunteer assignment efficiency.
- Developed REST APIs for managing volunteers, requests, and automated allocation logic.
- Implemented request fulfillment tracking and real-time assignment updates.

ACHIEVEMENTS

Secured **Second Runner Up** in **Smart ABES Hackathon (SAH) 2.0**, organized by the ABES ACM Student Chapter & ACM-W (2026).

Solved **100+** Data Structures & Algorithms problems on **LeetCode**.

CERTIFICATIONS

Python Programming Certification Udemy

Covered core concepts including data structures, functions, and OOP
